

ENERGY EFFICIENCY PACKAGE

6 STEPS TO ENERGY SAVINGS

THE SOFTWARE & HARDWARE PACKAGE TO HELP YOUR BUSINESS REDUCE ENERGY COSTS

1. REMOTE SITE ASSESSMENT

We need to check a few aspects of your energy meter box. Send us a photo of your meter box so we can provide a fixed quote.

2. INSTALLATION & ACTIVATION

An electrician will then install energy monitoring devices.

3. SIMBLESENSE SET-UP

Once the hardware is connected, you will receive login details for your SimbleSense account.

4. DISCOVER

Learn about your energy usage & associated costs. Discover what your business is doing that works well. Learn where, when & how your business can improve efficiency.

5. TACKLE

Set & reach budgets by making the necessary changes along the way. Improve when, where & how your business consumes energy to drive down energy costs.

6. ENERGY SAVINGS AUDIT

Dive deeper & continue saving once our energy specialists recommend further energy savings opportunities and investment projects.

SimbleSense

YOU CAN REDUCE THE ENERGY USAGE OF YOUR BUSINESS

The journey to discovering bottom line savings starts with the **Energy Efficiency Package** from \$530/year for 3 year subscription period*
Includes Monitoring for 6 circuits and access to the SimbleSense Platform
**installation costs apply*

Energy Monitoring Devices

Devices connect to meter boards and capture data which is visualised on the SimbleSense Platform.

SimbleSense Platform

Energy analytics software helping businesses understand their energy usage and reduce their energy consumption.

THE NECESSITY OF ENERGY EFFICIENCY SOLUTIONS

Energy is a significant cost for businesses. A lack of investment in energy efficiency leaves your business vulnerable to sustained price increases. Efficient energy usage can reduce energy costs by 20% and drive ongoing value to your bottom line.
